Emergency Shutdown of LPG Terminal at Randolph Harley Power Plant Scheduled for Tomorrow

St. Thomas, U.S. Virgin Islands (November 13, 2025) – The Virgin Islands Water and Power Authority (“WAPA” or “the Authority”) advises the public that Saintnals, the operations and maintenance contractor for the Liquefied Petroleum Gas (LPG) terminal, will carry out a controlled shutdown at the Randolph Harley Power Plant on St. Thomas to complete essential fuel system repairs. This work **may temporarily** affect operations on both St. Thomas and St. John.

The shutdown is scheduled to begin tomorrow, Friday, November 14, 2025, at 10:00 p.m., and is expected to be completed by Saturday, November 15, 2025, at 8:00 a.m.

WAPA Plant Personnel are making full efforts to prevent interruptions in service. However, if these measures are not sufficient, a temporary rotation outage schedule may be implemented impacting customers on St. Thomas and St. John.

To stay informed, customers can sign up for WAPA Alerts to receive notifications via text, voice, and email directly to mobile devices: <https://member.everbridge.net/892807736728730/new>.

These essential repairs are important for the safety and reliability of our service, and the Authority appreciates the community’s understanding and support.

###

About WAPA: The Virgin Islands Water and Power Authority is an autonomous agency of the Virgin Islands Government which produces and distributes electricity and drinking water to residential and commercial customers in the territory. WAPA was created by the Fifth Legislature of the Virgin Islands in 1964 through Act No. 1248. Today, WAPA generates electrical power at production plants on St. Thomas and St. Croix and distributes electrical service through smart grids to customers on St. Thomas, St. Croix, St. John, Hassel Island, and Water Island. Potable water is distributed to almost 13,000 customers through water lines and standpipes. WAPA also has the responsibility of installing and maintaining streetlights.
