Re: PR-18-20 Underground Project Golden Grove – St.Croix

Dear Ms Dovovan:

Vivot Equipment Corporation thanks you and the Virgin Islands Water and Power Authority for the opportunity to submit a bid proposal for the Underground Golden Grove Project on the island of St.Croix, USVI.

This project bid proposal is to replace the overhead electrical lines and its associated components to an underground infrastructure within the Golden Grove vicinity as noted in the bid documents.

Vivot Equipment is a long standing construction company within the U.S. Virgin Islands with an array of heavy equipment in its fleet which will be used to work on and complete this underground project. Our Project Manager has visited and walked the project site and is aware of the visible project conditions.

We appreciate the opportunity to provide a bid for this project.

Sincerely,

Patrick Vivot
