RE: PR-22-16 (CEMS Maintenance/Audit Services)

Dear Mr. Bott,

We would like for you to provide clarification on the following items:

- 1) Software Agreement – What is included in this agreement? What type of work is covered in this agreement? Does this includes PLC Logics modifications, Editing/Adding tags, and Modifying Reports?
- 2) Web Base Site – Can a Web based site (with remote access) for uploading and downloading Documents/Reports, viewing calibration reports and other data reports be included?
- 3) MS Excel/Access add in – Will CEMS System have the capability to import data in to Microsoft Excel and/or Access?
- 4) Training – DAHS and Basic EDR Training; Six hours is not sufficient, recommend Six hours for DAHS training and Six hours for EDR training. Would that be possible to include and at what added cost if any?
