## Hannah's Rest, St. Croix Waterline Rehabilitation Projects March 2024 Progress Report

### Hannah's Rest Waterline Rehabilitation

**Project Description:** Replacement of existing old ductile iron pipe with 10,800 feet of 6-inch C-900 PVC water pipe, valves, fittings, service connections, meter boxes, hydrants and road pavement restoration in Estate Hannahs Rest.

**Construction Start:** Construction to start late February.

**Project Timeline:** February 2024- September 2024

**Funding:** Drinking Water State Revolving Fund (DWSRF) by Environmental Protection Agency (EPA) - **Estimated Funds:** \$3,196,936

**What to Expect:** All residents in the area should be aware of construction activities that will impact road conditions, dust and noise levels as well as some scheduled water service interruptions as the new system is installed, tested and activated.

### Rehabilitation Process

#### Design

The Design Contractor, Caritech, surveys the area and creates the plans for the project based on Federal Guidelines.

#### Construction Solicitation

The Contractor, Marco St. Croix, Inc.; is selected to do the work according to the provided plans.
